

# GitHub Pages Deployment Instructions

## Quick Setup

1. **Create a new GitHub repository**
2. Go to GitHub.com and create a new repository
3. Name it something like `crypto-cassie-generator`
4. Make it public (required for free GitHub Pages)
5. **Upload the files**
6. Upload all files from the `github-pages-deployment` folder to your repository
7. This includes:
  - `index.html`
  - `assets/` folder
  - `README.md`
  - `crypto_cassie_specifications.md`
  - `crypto_cassie_specifications.pdf`
8. **Enable GitHub Pages**
9. Go to repository Settings
10. Scroll to "Pages" section
11. Source: "Deploy from a branch"
12. Branch: "main"
13. Folder: "/" (root)"
14. Click "Save"
15. **Access your site**
16. URL will be: `https://[username].github.io/[repository-name]`
17. May take 5-10 minutes to become available

## File Structure

```
github-pages-deployment/  
├── index.html
```

# Main HTML **file**

```
|— assets/
|   |— crypto_cassie_initial-[hash].png # Character image
|   |— index-[hash].css             # Styles
|   |— index-[hash].js             # JavaScript
|   — README.md                     # Documentation
|— crypto_cassie_specifications.md  # Character guide
|— crypto_cassie_specifications.pdf # Character guide (PDF)
```

## Features Included

### Fully Functional Interface

- Scene presets (Café, Beach, Podcast, Metaverse)
- Custom scene configuration
- Outfit selection
- Dialogue input
- Video prompt generation
- Copy to clipboard functionality

### Character Consistency

- Detailed character specifications
- Visual consistency guide
- Hyper-realistic appearance maintenance

### Responsive Design

- Works on desktop and mobile
- Professional UI with Tailwind CSS
- Smooth animations and interactions

### No Backend Required

- Pure static files
- Works entirely in the browser
- Perfect for GitHub Pages

## Usage After Deployment

1. Visit your GitHub Pages URL
2. Choose a preset or create custom scene
3. Select outfit style
4. Describe the scene setting
5. Write dialogue for Cassie
6. Click "Generate Video Prompt"
7. Copy the generated prompt

## 8. Use with your video generation tool

The generated prompts include all necessary details to maintain Crypto Cassie's consistent appearance, personality, and tone across all video content.
